1. Firms’ year-ahead unit cost expectations remain relatively unchanged at 2.4 percent. Year-ahead unit cost expectations have fallen meaningfully since hitting a peak of 3.8 percent in April 2022 but remain somewhat elevated relative to their pre-pandemic average of 2.0 percent (from January 2017 through December 2019).

2. Firms’ sales level continue to run below “normal.”

3. Regarding prices overall, firms are changing their price more frequently currently relative to the last time we asked this question (in March 2019).

4. Most firms (81 percent) indicated increasing prices, on net, over the last 12 months. Over the year ahead, more than 70 percent of the firms expect their price to increase.

5. On average, firms changed their price 14.7 times over the last 12 months and expect their price to change about 12 times over the next 12 months.

6. Firms’ year-ahead price growth expectations averaged 3.4 percent in October, its lowest reading since April 2021.
About the BIE

The Business Inflation Expectations (BIE) survey is fielded by the Federal Reserve Bank of Atlanta. It was designed, tested, and refined by the Atlanta Fed Economic Research Survey Center.

Our monthly Business Inflation Expectations survey goes to about 640 panel members (as of June 2023), who occupy executive and managerial positions at Sixth District firms. We contact panel members each month by email, and they respond via a web-based instrument.

Survey questions pertain to current, past, and future outcomes at respondents’ firms. Our primary objective is to elicit the respondent’s subjective forecast distributions over own-firm future unit-cost growth. We gather qualitative information on firms’ sales levels and margins on a monthly basis. We include a set of rotating quarterly questions covering firms’ longer-run probabilistic unit-cost expectations, quantitative sales gaps, and factors influencing pricing. Our survey also includes special questions on timely, policy-relevant topics.

For more information on survey design and methodology, please refer to resources on the BIE page.
Core Monthly Questions

Note: The data are shown monthly.

BIE Special Questions: October 2023
How often does your firm typically change the price of the product or service responsible for the largest share of your sales revenue?

Source: Atlanta Fed Business Inflation Expectations (BIE) survey
Over the past 12 months, what was the net effect of the price changes of the product or service responsible for the largest share of your sales revenue?

Note: The results are based on 199 observations.

Over the next 12 months, what do you expect to be the net effect of the price changes of the product or service responsible for the largest share of your sales revenue?

![Bar chart showing the percentage of Goods producers and Services producers for different net price changes.]

- **Net price increase**: 78.7% for Goods producers, 69.2% for Services producers.
- **Price will remain similar**: 12.8% for Goods producers, 20.8% for Services producers.
- **Net price decrease**: 8.5% for Goods producers, 10.0% for Services producers.

Note: The results are based on 177 observations.
