1. Firms’ year-ahead unit cost expectations remain relatively unchanged at 2.3 percent. Year-ahead unit cost expectations have fallen meaningfully since hitting a peak of 3.8 percent in April 2022 but remain somewhat elevated relative to their prepandemic average of 2.0 percent (from January 2017 through December 2019).

2. Firms’ sales level continue to run below “normal.”

3. In March’s special questions, businesses expect the following changes from now to the end of 2024: sales revenue to increase by 3.6 percent, the number of employees to increase by 2.8 percent, and CapEx to increase by 2.6 percent. They expect the prime rate to be 7.6 percent over year-end 2024.

4. Firms expect a more pronounced impact of a 2 percent rise in the prime rate compared to a 2 percent cut for labor and capital expenditures, in the event of a 2 percent decrease or increase of the prime rate.
About the BIE

The Business Inflation Expectations (BIE) survey is fielded by the Federal Reserve Bank of Atlanta. It was designed, tested, and refined by the Atlanta Fed Economic Research Survey Center.

Our monthly Business Inflation Expectations survey goes to about 690 panel members (as of February 2024), who occupy executive and managerial positions at Sixth District firms. We contact panel members each month by email, and they respond via a web-based instrument.

Survey questions pertain to current, past, and future outcomes at respondents’ firms. Our primary objective is to elicit the respondent’s subjective forecast distributions over own-firm future unit-cost growth. We gather qualitative information on firms’ sales levels and margins on a monthly basis. We include a set of rotating quarterly questions covering firms’ longer-run probabilistic unit-cost expectations, quantitative sales gaps, and realized/expected price change. Our survey also includes special questions on timely, policy-relevant topics.

For more information on survey design and methodology, please refer to resources on the BIE page.
Core Monthly Questions

Note: The data are shown monthly.

Realizations and expectations by industry
Firms’ realized unit-cost growth across most broad industry classifications continues to ebb from peak levels.
Year-ahead unit-cost expectations vary meaningfully by sector.

Note: The data are shown monthly.
Source: Atlanta Fed Business Inflation Expectations (BIE) survey
Longer-run unit cost expectations across most broad industry classifications remain elevated relative to prepandemic averages.

Note: The data are shown monthly.
