Business Inflation Expectations (BIE) Survey

Monthly Report: August 2024
Headline Results

1. Firms’ year-ahead unit cost expectations remain relatively unchanged at 2.2 percent. Year-ahead unit cost expectations have fallen meaningfully since hitting a peak of 3.8 percent in April 2022 but remain somewhat elevated relative to their pre-pandemic average of 2.0 percent (from January 2017 through December 2019).

2. Firms’ sales level continue to run below “normal.”

3. In August’s special questions, we focused on firms’ expected effective federal tax rate (ETR) and how shocks to their ETR change their business decisions.

4. Firms on average expect their ETR to increase slightly by 2026, though many firms in our sample have a very low ETR and do not expect that to change.

5. Given an unexpected increase or decrease to their ETR by 2026, about half of firms do not expect their capital expenditures, employment, or cash holdings to change that much in the next 12 months.
About the BIE

The Business Inflation Expectations (BIE) survey is fielded by the Federal Reserve Bank of Atlanta. It was designed, tested, and refined by the Atlanta Fed Economic Research Survey Center.

Our monthly Business Inflation Expectations survey goes to about 690 panel members (as of February 2024), who occupy executive and managerial positions at Sixth District firms. We contact panel members each month by email, and they respond via a web-based instrument.

Survey questions pertain to current, past, and future outcomes at respondents’ firms. Our primary objective is to elicit the respondent’s subjective forecast distributions over own-firm future unit-cost growth. We gather qualitative information on firms’ sales levels and margins on a monthly basis. We include a set of rotating quarterly questions covering firms’ longer-run probabilistic unit-cost expectations, quantitative sales gaps, and realized/expected price change. Our survey also includes special questions on timely, policy-relevant topics.

For more information on survey design and methodology, please refer to resources on the BIE page.
Core Monthly Questions

Note: The data are shown monthly.
